***Claim Rejections - 35 USC § 112***

Claim 26-32 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

- i) Claim 26 is drawn to a method of treating nervous strain. A search in the literature and medical dictionaries was conducted for this “disorder” but not found. None of the medical dictionaries list this “nervous strain” as a disease, disorder or condition that needs treatment. A clarification is required because it is not known what is being treated. It is noted that such language was allowed in US 6,664,262. It seems that nervous strain is an effect caused by stimuli, such as, noise, and not a disease.
- ii) Claim 27 requires the pharmaceutical composition to comprise a compound and salt and carrier. Is this intended or is a compound or salt thereof intended?

Claims 28 and 29 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claims, or amend the claims to place the claims in proper dependent form, or rewrite the claims in independent form. See for example claim 28. The only compound in claim 27 is N-methoxymethyl-5,5-diphenyl-barbituric acid.

Applicant is advised that should claims 27-29 be found allowable, claims 30-32 will be objected to under 37 CFR 1.75 as being a substantial duplicate thereof. When two claims in an application are duplicates or else are so close in content that they both cover the same thing,

Art Unit: 1624

despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

Different intended uses are given no material weight in such claims. Note *In re Tuominen* 213 USPQ 89.

### ***Information Disclosure Statement***

In the IDS filed 04/30/04, citations CK to CP have not been considered because these are not actual references. A line is drawn through these citations because they are not according to the rules. See MPEP 609.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 26-32 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 13 of U.S. Patent No. 6,664,262. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant method and pharmaceutical composition are claimed in claim 15. One skilled in the art would be motivated to select any medical condition, including nervous strain, and arrive at the instant claims because the patent embraces this.
